

The 17th Sinkhole Conference

Tampa, Florida: March 27–31, 2023

Join us for this important international meeting on the practical application of karst science. Meet with engineers, geologists, and geographers, who study how and where karst develops and how sinkholes form, interact with engineers and planners, who apply this information to building and maintaining society's infrastructure while protecting our environment.

The National Cave and Karst Research Institute offers this exceptional 2023 meeting in one of the most sinkhole-prone regions in the world.

Topics include: Karst Development & Mapping, Proactive and Remedial Engineering in Karst, Karst Water Resource Management, Karst Investigations, and Karst Policy, among others. Optional Short Courses and Field Trips will be offered.

More details to come and watch for at: sinkholeconference.com.

Organizers and Sponsors are:
