

## **David Horhota, Ph.D., P.E.**

### Biography

David Horhota currently is the State Geotechnical Materials Engineer at the State Materials Office. He is the section manager overseeing the Geotechnical/Foundations, Aggregate Control, and the Soils Materials/Earthwork sections. He has been with the Florida Department of Transportation for nearly 37 years, all at the State Materials Office, working in the area of geotechnical materials and testing.

David received his Doctoral Degree in 1996 from the University of Florida. Both his Masters and Ph.D. were obtained while working with the Department on DOT-sponsored research projects in the areas of geotechnical engineering, organic soils, and geophysical testing.
